OBJECTIVE:

I have completed Lincoln Electric's welding school program and am ready to grow with the right employer. I am a hard working laborer and have experience with many machines, cranes and the like. As a people person I strive for perfection and am looking for a good company to extend my skills with.

EXPERIENCE

C&I Boiler Repair - Montoursville, PA

10/04/2009 - Present

Welder/Boilermaker

I have a wide variety of responsibilities at my job. Everyday I do something new. I use many different tools such as grinders, wire wheels and cut off wheels, torches, plasma cutters, welders, chain falls, overhead cranes, and many more. On a daily basis I troubleshoot any problems and successfully communicate with others to make any repairs necessary to the boiler.

EDUCATION

Lincoln Electric Welding School

09/10/2007 - 01/28/2008

Cleveland, Ohio

Attained other Post-Secondary or Certification

Skills and Achievements

Throughout high school I was enrolled in metal shop and wood shop classes. Through these classes I have been introduced to many power tools and shop equipment, used in the fabrication of metal and wood items. I also was involved with Habitat for Humanity for one year. During this time I learned how to hang dry wall and run electric cables. I also learned teamwork skills. I am a new welder with experience in MIG, TIG, stick and pipe welding. I have had many temporary jobs varying from die cut press operator to warehouse work. Lengths of employment range from two weeks to a few months. I am experienced in restaurant work as well. Through these temporary and seasonal jobs I have had work experience with presses, sheers, forklifts and more. After finishing school I have had some welding jobs including structural MIG and flux core welding, however, these jobs were short lived due to a slow industry. I AM READY TO WORK FULL TIME AND LONG TERM with the right company. I am willing to work hard and learn any position, from labor to working with people to achieve the desired results of my employer
